

Teachers in Residence

Enhancing your knowledge of design,
manufacturing or engineering for the classroom

Connecting secondary teachers with industry professionals

Would you like the opportunity to work with a UK-based design, manufacturing, engineering or construction business?

The Association are offering design and technology, science and maths teachers the opportunity to take part in a 5-day internship which will help you:

- develop a deeper understanding of modern industry, and the technical skills and attributes required by employers
- have a clearer view of the career pathways and opportunities available for your students, which in turn will support your school's delivery of the government careers strategy.

If you would like to take part in this initiative, you will need to commit five days of your holiday or agree 5 days release with your school. In return we will match you to a company, where you will be fully immersed in their day-to-day activity, gaining first-hand experience of modern industry, and developing meaningful industry engagement links which will benefit you and your students.

For further information or to register your interest, please contact Lata Patel, lata.patel@data.org.uk

Background

This initiative is managed by the Design and Technology Association, funded by the Institution of Engineering and Technology and the Institution of Mechanical Engineers, and supported by the Sorrell Foundation, Design Business Association, MakeUK, MTA and Semta.
